How the NAM Can Support Your Work

NATIONAL ACADEMY of MEDICINE

The National Academy of Medicine (NAM) is an independent, evidence-based, trusted advisor; a national academy with global scope; committed to catalyzing action and achieving impact; collaborative and interdisciplinary; and an honorific society for exceptional leaders elected by their peers. Whether your work relates to one or many urgent national health priorities, the NAM can support your work with evidence-based and scientifically informed advice and resources.

Founded in 1970 as the Institute of Medicine (IOM), the NAM is one of three academies that make up the National Academies of Sciences, Engineering, and Medicine (the National Academies) in the United States. Operating under the 1863 Congressional charter of the National Academy of Sciences, the National Academies are private, nonprofit institutions that work outside of government to provide objective advice on matters of science, technology, and health.

Responding to Critical and Pressing Issues

- Clinician Well-Being
- Gene Editing
- Climate Change & Human Health
